AN INDEX

To

Farm and Fireside

1913-1914

This index is carefully prepared with the idea of serving the readers who keep their copies of Farm and Fireside for reference. It covers the months of October, November, December 1913, and January, February, March, April, May, June, July, August, September 1914. It affects both editions of Farm and Fireside, the Eastern and the Western. That is what is meant by the capital E and the capital W occasionally following the references. The articles which apply to one section more than to another are placed to the advantage of the reader whom we know will be reached. If you receive a Western copy of Farm and Fireside you can simply disregard the references marked with an E. If you get the Eastern edition pay no attention to the references marked with W. All the other references will interest you.

This index shows what an enormous supply of good things reach the readers each year. This present year will be no exception, for we shall give to our readers the best things in agriculture as people are now thinking of them.

FARM AND FIRESIDE
